

In our busy environment, we may not find the opportunities to be introduced to new activities that enhance our growth, or meet people at all levels in our company and our community. The *Boeing Space Coast Chapter of the National Management Association* provides these opportunities through activities that are of benefit to our company, our community, and your personal and professional growth.

NMA stands as an excellent "learning organization", where men and women have enhanced their professional development. The Boeing Space Coast Chapter advances opportunities to broaden your network, improve your communication and teamwork skills, expand your knowledge on a broad base of topics, and develop and *exercise* your leadership skills. The Chapter's "learning organization" fits well with Boeing's strategy of continual learning and leadership development.

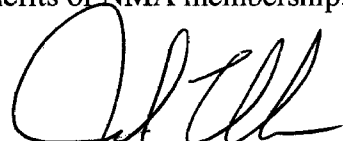

The Boeing Space Coast Chapter aligns with the Boeing value of "*People Working Together*" across all levels and activities of the company. This is one of our company's fundamental values and one of our greatest competitive advantages. The Chapter offers a venue for cross-organizational teaming and problem solving, and facilitates diversity.

The Boeing Chapter of the NMA is also an exceptional avenue to connect with the "cultural tradition" within Boeing to be active in the community. The Chapter's ongoing programs benefit the county's children through scholarships, cleanup Brevard's outdoor environment, and support local and national charitable organizations.

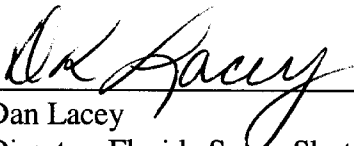

NMA is an excellent tool for Boeing people to strengthen their value as employees in today's competitive world. I endorse the *Boeing Space Coast Chapter of the National Management Association*, commend those who continue membership, and encourage those who are non-members to join and enjoy the many benefits of NMA membership.
